

HEALTH INFORMATION SYSTEM

**Because of you, we can provide access to important health care information to the thousands of people we care for at Stevenson each year**

## HEALTH INFORMATION SYSTEM

Because of you, we can provide access to important health care information to the thousands of people we care for at Stevenson each year

### SHARED HEALTH INFORMATION NETWORK EXCHANGE (SHINE)

Our recent partnership with Markham Stouffville Hospital and Southlake Regional Health Centre to implement a new Health Information System (HIS) at all three hospitals is referred to as Shared Health Information Network Exchange (SHINE). The first of its kind in Ontario, SHINE allows us to participate in the creation of a sophisticated electronic records system that would otherwise be unattainable. Investing in this highly advanced system will revolutionize health care here at Stevenson. Most importantly, it will provide us opportunities to spend more quality time with those we have the privilege of serving: people like you and your family!

### PEOPLE REALLY VALUE HAVING EXCELLENT HEALTH CARE CLOSE TO HOME

"If we didn't have access to a hospital so close to home our son would not be here today."  
– Crystal Hollingshead

"I was just so impressed with the quality of care that I received from the doctors and nurses at Stevenson Memorial Hospital. They went above and beyond the call of duty for me." – Lee

"Stevenson Memorial Hospital is an excellent hospital with amazing staff! The hospital is a vital part of our growing community."  
– Robin and Blanche Burne

Because of you, we can provide exceptional health care close to home
